

## GT-VR controler 5.1 Hardware Platform

GT-VR controler 5.1 is a hardware platform with 5 instances of software already installed on the device. GT-VR controler 5.1 is designed to maximize the features and benefits for controlling up to 5 standard spaces (e.g. a standard space could include a scaler, monitor, lighting system, touch panel and keypad). Enterprise-class, revolutionary, user-friendly, software application that enables you to execute all your room control actions straight from a computer without installing a physical Brain between the user interface and the controlled devices. Using the power of Control cloud-based control & space management platform, it enables you to operate multiple devices over Ethernet such as scalers, video displays, audio amplifiers, Blu-ray players, sensors, screens, shades, door locks, and lights. Designing a system was never easier, with intuitive drag & drop Builder. Install, configure and modify your control system without any prior knowledge in programming

### Feature:-

- Simplified AV Installation: Control up to 5 rooms without installing a physical Brain
- Scalable to Your Installation: Supports controlling up to 5 standard spaces
- Format Conversion: Use control format converters to enable controlling almost any device
- Fully Customizable UI: Using Control, easily personalize your control interface any way you like
- Space Controller: Controls any AV device with its corresponding logic
- Simple Configuration: Install and start using the platform in minutes with easy configuration

### TECHNICAL SPECIFICATIONS

Ports	3 USB: On 2 USB 3.0 connectors and 1 USB connector 1 LAN: On an RJ-45 connector
Inputs	1 HDMI: On a female HDMI connector
Output	1 HDMI: On a female HDMI connector
General	Processor: 4th generation Intel® Dual core 1.4GHz Main Memory: 4GB, high speed Storage: 32GB, solid-state drive LAN: Gigabit LAN
Power	Source: 12V DC Consumption: 700mA
